

FormRequest

```
classDiagram
    class FormRequest
    class LoginRequest["App\\Http\\Requests\\Auth\\LoginRequest"]
    LoginRequest --|> FormRequest
```

The diagram illustrates a class hierarchy. At the top is the 'FormRequest' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'FormRequest', while the middle and bottom compartments are empty. Below it is the 'App\\Http\\Requests\\Auth\\LoginRequest' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment lists five methods: '+ authorize()', '+ rules()', '+ authenticate()', '+ ensureIsNotRateLimited()', and '+ throttleKey()'. A blue arrow with an open triangular head points from the 'App\\Http\\Requests\\Auth\\LoginRequest' class up to the 'FormRequest' class, indicating that 'App\\Http\\Requests\\Auth\\LoginRequest' inherits from 'FormRequest'.

App\\Http\\Requests\\Auth
\\LoginRequest

- + authorize()
- + rules()
- + authenticate()
- + ensureIsNotRateLimited()
- + throttleKey()
